1. Power-on Indicator Light
2. Power ON/OFF Button
3. Mode Select Key: R – for Wireless Receiver mode, P – for Play mode
4. Menu Key: In menu, press Menu key to choose: Delete/Copy/move the saved content
5. AV-IN port: Under play mode, be able to record by connecting with external audio/video signals. (such as: camera, MP3, MP4 player)
6. Wireless Receiver Channel Switch/Choice Key: Under receiver mode, press this key to choose CH1, CH2, CH3 or CH4 manually.
7. STOP/ESC Key: Under any operation of play mode, press ESC key to stop the current function and back to the previous menu.
8. Play/Confirmation Key: In any case, press this key to enter the corresponding menu or sub-menu to such case.
9. Prev Key: Be able to counter-clockwise choice Main menu
10. UP Key: Be able to upwards choice Menu
- ⑪ AV-OUT port: Support the connection to external display and can play saved video
- ⑫ USB2.0 Port, OTG Supportable

- ⑬ Down Key: Be able to Downwards choice Main Menu
- ⑭ Next Key: be able to clockwise choice menu
- ⑮ Video Record Key: In any case, Start/Pause video record
- ⑯ Power IN Port, able to charge the in-built polymer lithium batteries under the state of POWER-ON
- ⑰ Stereo Earphone Port
- ⑱ SD/MMS Card Port: Support 16M to 4GB

Packing Information:

			
1x PVR-JS928	1x OTG Connector	1x USB Cable	1x AV cable
			
2x DC Adapter	1X CN-7088PA	1 X User manual	1x Stereo Earphone

Notices:

Before use, please read the following notice: Since this equipment is controlled by micro-processor, it is normal that the equipment is dead due to improper operation. Please turn off the equipment or reset it. Then restart it.

1. Never use this equipment in the place of high temperature, much dampness and dust or where is close to powerful magnetic field. The optimal working temperature for the equipment is approximately 0-40 .
2. Never put the equipment in the place where there is direct sunlight (such as on the car in the open air, or on the beach etc).
3. Data loss are due to the unstable power supply during transmission and it is strongly

recommended that the data had better be copied; our company is not responsible for any data loss.

4. When connecting with PC, never operate this equipment so as to avoid data loss or data can't be updated.
5. Please put this equipment out of the reach of children so as to avoid falling or serious damage by the sharp parts.
6. Never make the player fall, bump or shock.
7. Never replace the batteries without authorization or puncture the batteries or put the batteries into fire, so as to avoid damage caused by the explosion of the batteries.
8. Never disassemble and repair this equipment, contact the distributor or our company when having questions.
9. When the equipment hints that it is under low voltage, please recharge the batteries immediately, otherwise, it may be cause abnormal recording, playing function and startup.
10. It is strongly recommended that the user should use the SD cards of the authorized factory.
11. When earphone is used, never turn on the volume too loud and listen for long time, otherwise the ear may be damaged.
12. Please use the power adapters and other accessories attached to this player, because the use of other power adapters may cause electrical shock or fire.
13. Never touch the power adapter with wet hand, otherwise, electrical shock may occur.
14. Do abide by the special regulations in any case and at any place.

Function Introduction:

I Wireless Receiver Record Function

- 1) 2.4GHz Wireless receiver record: record Video (CIF, VGA 30 frames/s)
- 2) AV in : Record Video and Audio signals (CIF, VGA 30 frames/s)

I Multimedia Play Function

- 1) **MP3 play function:** play Audio formats (MP3, WAV, supportable), with lyric displaying simultaneously.
- 2) **Video play function:** play network movies, support MPEG-4 of AVI format or AVI converted with conversion software, play effect: 320X240 @ 30fps, or 640X480 @ 30fps.
- 3) **DCIM play function:** play the programs recorded with AV IN, Audio IN and Microphone IN.
- 4) **Photo browse function:** browse the photos of various cameras or pictures downloaded from computer etc, EXIF2.1 supportable.

I Setup Function

Time setup, date setup, button voice setup, language selection, Storage selection, display, trademark, brightness setup, system default setup, system upgrading setup, automatic power-off time setup and formatting.

| **Info Function**

It is used to query the capacity of the memory, SD card, USB disc and its edition.

| **Movable Memory**

USB 2.0 and USB OTG, HDD supportable

Basic Operation

| **Power-on Operation**

Press **POWER KEY** to start up, the indicator light is on and the equipment enters standby menu of receiver.

Switch **MODE SELECT KEY** to choose mode

Switch to “**R**” to enter wireless receiver mode

Switch to “**P**” to enter Player mode.

| **Power-off Operation**

Press **POWER KEY** to enter the power-off state and the equipment will hint with a power-off menu

| **Charge Operation**

Insert the charger into the socket and connect the port of the charger into the charge port of the receiver, now the equipment enters the state of charging . Also, charge can be conducted by means of connecting the equipment with the computer via the USB port. At this moment, the red indicator light is on. Generally, the charge time shall last approximately **5 hours**. It is strongly recommended that the charge is conducted when the equipment is powered off.

Note: Charge can be performed whether the equipment is on or off (better), When under charging, the indicator light is red; when the charge is over, the indicator light turns green, and at this moment, you can unplug the charger. It is recommended that the charge at the first time should be 10 hours so as to activate the batteries.

I PC Communication

Connect the bigger end of the USB cable that is attached to the equipment package to the USB port of the computer while the smaller end to the USB port of the Receiver. At this moment, connection illustration displays on the receiver, hinting that the equipment is connecting with PC for communication. In such state, pressing any key of the receiver is invalid.

Detailed Operation Introduction

Record Operation

I Wireless Receiver Mode

- 1) Press **POWER KEY** to enter standby menu, switch **MODE SELECT KEY** to select mode and select **R** for Wireless receiver mode.
- 2) Press **CHOICE KEY** to select receiving channel: CH1:2.414GHz / CH2: 2.432GHz / CH3: 2.450GHz / CH4: 2.468GHz
- 3) Press **REC KEY** to enter recording state, and start recording when red dots occur on the screen.
- 4) Press **REC KEY** to exit from recording

I Wired Video Mode

- 1) Switch **MODE SELECT KEY** to select mode and select **P** to enter Player mode
- 2) Press   to choose RECORD and enter
- 3) Press   to switch to recording (AV in) mode, connect the video out/audio out port of the external video and audio equipments to the “AV IN” port of the receiver with AV connection cable. Press **REC KEY** to enter recording mode, and start recording when red dots occur on the screen
- 4) Press **REC KEY** to exit from recording

I Resolution Setup

Under wired Video mode, press **MENU KEY** to enter the two submenus of Resolution and AV quality.

Press   to switch to resolution submenu, with two options: 320X240 and 640X480, switch   to select, and press OK key to confirm and press **MENU KEY** again to exit from this submenu and press ESC key to exit from the operation.

I Quality Setup

Switch   to AV quality submenu with three options: Standard, Better, Best, and press OK key to confirm and press **MENU KEY** again to exit from this submenu and press ESC to exit from the operation

Note: Can connect the equipment with external display to see the recorded Video simultaneously.

I Setup Function

1. Press **POWER KEY** to enter PLAYER standby menu, when seeing the main menu, select the corresponding sub-menu with  
2. Press   to select SETUP function, press OK key to confirm, and the following submenus display: **Date & Time, Beep, Language, Storage, Display, Logo, Brightness, Defaults, Update, Power-off, Format.**
3. Switch   to “Storage” menu, press OK key to enter, then three kind of storage available : Nand flash, MSDC, U disk, and then press “+ / -“ key to select the wanted storage, press OK key to confirm and exit, the storage result cannot be accumulated. PC-cam is upgrading port while PC-MSDC is movable disc. Note: When SD card is inserted and the equipment is powered on, the system will default to be SD card, while no SD card is inserted or SD card is inserted after the equipment is powered on, the system will default to be Nand Flash.
4. Press   to switch to “ Logo” menu and press OK key to enter and then see the Logo Picture of power-on.
5. Date/Time Setup:
 - 1). Press   to switch to “ Date&Time” menu and priss OK key to enter, now the menu displays three sub-menus: Date Format, Date Setting and Time Setting. Press ESC KEY to exit.
 - 2). Press   to switch to “ Date Format” menu and press OK KEY to enter, two options as “ Year/Month/Date” and “ Date/Month/Year” display, press   to select and press OK KEY to cofirm and exit.
 - 3). Press   to switch to “ Date Setting” sub-menu and press OK KEY to enter, press   to shift the cursor to the position to be changed, then press   to switch to the number to be set, then the operation is completed, after change is over, press OK KEY to confirm and exit.
 - 4). Press   to switch to “ Time Setting” sub-menu and press OK KEY to enter press   to shift the cursor to the position to be changed, then press   to switch to the number to be set, then the operation is completed, after change is over, press OK KEY to confirm and exit.

6. Press   to switch to “Beep” menu and press OK KEY to enter, Press   to select button voice on/off, press OK KEY to confirm and exit.
